Professional Summary

Experienced Frontend Developer with a strong foundation in React.js, Next.js, React Native, Liquid, and Vue. Skilled in crafting intuitive and visually appealing user interfaces, I've successfully delivered various web applications, including enterprise IoT platforms. My proficiency in REST API and DOM, combined with my ability to manage teams, time, and code reviews, makes me a valuable asset to any development team. I'm dedicated to staying at the forefront of web development trends.

Professional Experience

Sr. Frontend Developer
PT. Iot Kreasi Indonesia
January 2021 – Present

As a Senior Frontend Developer, I am responsible for developing the company's IoT platform and the Badiklat Kemhan platform, creating an engaging company profile, building responsive design concepts and interface components, optimizing the website to be SEO friendly, and collaborating with clients to enhance platform performance.

Frontend Developer
80&Company
July 2024 – January 2025

As a Frontend Developer, I fix bugs, customize websites based on Figma designs, create new pages and Shopify templates for the KOSE MUWMAZE online shop, collaborate with senior developers through pull requests, communicate with the project manager on issues, meet deadlines, and develop projects using Next.js.

Project Manager
Kisah Kreatif
February 2023 – March 2024

As a Project Manager and Frontend Developer at Kisah Kreatif, I built the Pilog website for PT. Pupuk Indonesia Logistik, created an LMS-like site, and managed domain and VPS settings, while overseeing project timelines and budgets, developing frontend sections, negotiating contracts, and integrating the Mayar payment gateway.

Fullstack Developer
PT. Trimagnus Prima Dharma
January 2020 – January 2021

As a Fullstack Developer, I developed the Wira Energy app (ERP & IoT Management) for Client Wira and the Hoops Indonesia (E-Commerce) application, utilizing skills in JSON Web Token (JWT), Git, front-end development, REST APIs, debugging, the Document Object Model (DOM), performance testing, and software testing.

Education

Information Systems
BINUS ONLINE
Graduated: February 2026

As a Information Systems student at BINUS Online, I study various subjects including project management, accounting, business analysis, programming with Java NetBeans, data management with Laravel, UI/UX design, character education, language proficiency, information security, ERP/CRM/SCM systems, data warehousing, and decision support systems.

Bootcamp Fullstack Developer
Pijar Camp
Graduated: August 2019

I present weekly progress updates, participate in daily stand-ups to track advancements, and focus on learning JavaScript, developing REST APIs using Node.js and Express, building applications with React.js and React Native, and exploring real-time databases like Firebase.
